

Education

- 2013 - 2017 **Bachelor of Technology - Mechanical Engineering**, *National Institute of Technology Karnataka (NITK)*, Surathkal, Karnataka, India
Ranks in the top 10 engineering institutions in India under the [National Institutional Ranking Framework \(NIRF\)](#)

Work Experience

- 2019 - **Technical Associate**, *Indian Institute of Science (IISc)*, Bangalore
Present Department of Electronic Systems Engineering & Center for Networked Intelligence
- Selected as a Technical Associate at Cisco - Center for Networked Intelligence (CNI), IISc. Recommended by a committee at CNI, under the division of EECS and Robert Bosch Center for Cyber-Physical Systems (RBCCPS)
 - Leading industry-funded novel research projects which also includes planning, and procuring components while judiciously utilizing the available funds.
 - Indian Institute of Science is the [top ranked university under NIRF](#).
- 2017 - 2018 **Team Leader**, *Hindustan Coca-Cola Beverages Private Limited*, Hyderabad
Maintenance and Total Productive Maintenance (TPM)
- Managed a team of 20+ equipment associates to achieve consistent reliability of utility systems.
 - Completed the graduate engineering trainee (GET) program with rotations in sales, road-to-market (shipping), and factory operations.

Skills

- Programming Python, MATLAB, P4, C, C++, Embedded C
Hardware Netronome Agilio Smart NIC, Nordic nRF52 series, Arduino, NetFPGA-SUME
Others Autodesk Fusion 360, 3D printing, Adobe Premiere Pro, Implementing papers
Languages English (IELTS score 8/9), Hindi, Tamil, Kannada, Sourashtra

Projects

- Mar' 2022 - **Designing Tactile Cyber-Physical Systems**, *Indian Institute of Science*, Under Dr. Chandramani Singh & Dr. T V Prabhakar, Funders: Ministry of Electronics and Information Technology (MeitY), Govt. of India & Cisco CNI
Present
- Built a Tactile Cyber-Physical System (TCPS) testbed with a robotic arm and haptic device to demonstrate teleoperation for real-time interaction between humans and robots in real and virtual worlds for applications requiring ultra-reliable low latency communication (uRLLC).
 - Programmed a Geomagic Touch haptic device with C/C++ to asynchronously get coordinates and velocity and send it to the robot as UDP packets. Programmed a UR3 robotic arm using ROS-Python to receive control packets, move to desired pose and send position feedback.
 - *Novelty - EdgeP4*: Developed and implemented edge intelligence algorithms for teleoperation, *pose correction* and *tremor suppression* on P4-programmable network edge switch ports. Reduced control loop latency ($<100\ \mu\text{s}$ for *pose correction* task) and network load (99% reduction). Multiple algorithms can be hosted on the same edge switch which can transparently switch between the algorithms depending on the tasks.

- Mar' 2021 - **Time Sensitive Networking (TSN) switch**, *Indian Institute of Science*, Under Dr. Chandramani Singh & Dr. T V Prabhakar, Funders: Ministry of Electronics and Information Technology (MeitY), Govt. of India & Cisco CNI
- Building an IEEE 802.1 TSN capable ethernet switch by implementing in hardware, a. time synchronization (IEEE 802.1AS), b. Time Aware Shaper (IEEE 802.1Qbv), and c. packet duplication and elimination (IEEE. 802.1CB).
 - *Novelty* - P4TAS: Did a P4-based system implementation of Time-Aware Shaper onto a programmable SmartNIC. Achieved a latency bound of 20 μ s between two end hosts connected through two switches (built using SmartNICs).
 - *Novelty*: Developed packet de-duplication algorithms for SmartNICs to efficiently eliminate duplicates for enhancing the reliability of Scheduled Traffic in Time-Sensitive Networks. For duplicating over two links with 10% packet losses in each, achieved perfect de-duplication for a single 2.5 Gbps stream. For 12 simultaneous streams of total 1 Gbps, obtained de-duplication efficiency of 99.88% with 99.83% packet delivery.
- Mar' 2020 - **5G AMMAZING**, *Indian Institute of Science*, Under Prof. K J Vinoy & Dr. T V Prabhakar
- June 2022
- An end to end 5G mmWave system for infotainment.
 - *Novelty*: Data & control plane of a video stream split over 5G and regular Wi-Fi.
 - Currently shortlisted in top 10 teams in ongoing 5G Hackathon by Dept. of Telecommunication, Government of India.
- July 2020 - **Wi-Fi Modelling**, *Indian Institute of Science*, Under Prof. Neelesh Mehta & Dr. Chandramani Singh, Funder: Boeing
- June 2021
- Modelling & simulation of IEEE 802.11n & 802.11ac using MATLAB.
 - Performance Metrics: throughput, packet error rate & range.
 - Implementing Rate Control Algorithms in MATLAB.
- Feb' 2020 - **Video Casting in dense environment**, *Indian Institute of Science*, Under Dr. T V Prabhakar, Funder: Boeing
- Jan 2021
- Considering that 2.4 & 5 GHz Wi-Fi is congested in an aircraft cabin in which 400+ passengers use devices to cast media onto seat back displays in close proximity, the possibility of using IEEE 802.11ad, 60GHz Wi-Fi (Wi-Gig) & 802.11ax (Wi-Fi 6E) was explored.
 - WLAN Toolbox in MATLAB was used to simulate the physical behavior of Wi-Fi transmissions in a dense environment.
 - *Novelty*: Developed an algorithm that dynamically allocates different channels to 400 transmitters such that the packet error ratio is zero (PER = 0).
- June 2019 - **Airplane IoT data management**, *Indian Institute of Science*, Under Dr. T V Prabhakar, Feb' 2020 Funder: Boeing
- Developed machine learning algorithms to classify anomalies and take corrective actions using real-time data generated from sensors from a MATLAB/Simulink model of an aircraft environmental control system.
 - *Novelty*: Developed an algorithm that does linear interpolation between non-consecutive data points from time series data to adaptively store data based on a cost function which balances storage space savings and error in reconstruction of data. Achieved 96% savings in storage space.
- Mar' 2019 - **Acoustics Based Localization**, *Indian Institute of Science*, Under Dr. Chandramani Singh & Dr. T V Prabhakar, Funder: Boeing
- Jan' 2020
- Developed an application to locate multiple wireless edge devices with embedded microphones by using audio signals from speakers.
 - Simulated a few localization algorithms using MATLAB. Implemented KNN fingerprinting based localization of the receivers (programmed Nordic nRF52940 based nodes using embedded C)
 - Achieved localization accuracy of 98%.
 - *Novelty*: Unlike the usual source localization, here, the receivers (mics) are localized when the locations of speakers are known.
- Nov' 2017 - **Total Productive Maintenance (TPM)**, *Hindustan Coca-Cola Beverages Pvt. Ltd.*
- Apr' 2018
- Implemented TPM steps 4 and 5 in the bottling plant which led to the **JIPM TPM Consistency Award**. This included the following work:
 - Conducting TPM audits, collecting data, and performing root cause analysis (RCA) for equipment failures
 - Training and coaching operators using one-point lesson (OPL) drives
 - Planning the cleaning, lubrication, inspection and tightening (CLIT) checklist and schedule

- Jul' 2016 - **Attitude Control of a CubeSat Using Reaction Wheels**, *National Institute of Technology,*
Apr' 2017 *Karnataka*, Bachelor's thesis project under Prof. Prasad Krishna
- Designed a suspended body and achieved precise control of its yaw using reaction wheels using a manually tuned PID controller.
 - Modeled it in Simulink and implemented Model Reference Adaptive Control (MRAC) using the MIT rule and compared it with PID control.

Volunteering

Taught middle and high school students at **Yuwa School** in Hutup Village in Jharkhand in February 2019. Coached students in tackling interviews. Prepared the team to attend the Laureus Awards 2019, where Yuwa won in "**Sports for Good**" category.

Interests

Swimming, PC gaming, 3D printing
